MEDIA RELEASE - No. 613/LG

1st May 2006

THE PREMIER INDUSTRY EVENT - THE TTNA ANNUAL CONFERENCE - 2006

Thursday 31st August 2006
Melbourne

Being held at the centrally located five star Langham Hotel at Southgate (Melbourne), **THE TTNA ANNUAL CONFERENCE - 2006** will bring together representatives from technical textile and nonwoven companies, R&D agencies, suppliers and end-users from all over Australia and the world to hear a collection of interesting and inspiring presentations.

Creative and innovative uses of technology in design, engineering, processing and manufacturing are revolutionizing many industries. New technologies create profound challenges and opportunities for the technical and nonwoven textiles industry. Training and education issues along with research and development are vitally connected to advances in technology. The application of technical and nonwoven textiles covers all aspects of everyday life from medical, protection and performance textiles through to environmental, automotive, construction and agricultural textiles. The future is positive!

The TTNA events committee is now calling for presentations and papers addressing new technologies and innovations that will create product and market opportunities including training, education, research and development and manufacture and supply of technical and nonwoven textiles.

This conference will present the opportunity for personnel from all sectors of the industry to participate as either a speaker, exhibitor, sponsor or delegate. Further details can be obtained from Lorraine at the TTNA Management Office and the TTNA website – www.ttna.com.au.
