

## Two Courses in One Week:

## The Nonwovens Basics Course 2008

## Nonwovens Product Development Workshop 2008

The Nonwovens  
Basics Course (1 day)

Monday 12th May 2008

The Nonwoven  
Product Development  
Workshop (3 day)

Tuesday – Thursday

13th -15th May 2008

CSIRO Textile and Fibre Technology  
Cnr Princes Hwy and Henry Street  
BELMONT (Melways Map 465 F1)

8.30 - 5.30 pm each day

The TTNA and CSIRO Textile and Fibre Technology, in conjunction with the International Fibre Centre (IFC), once again present two workshops in one week, designed to educate nonwoven industry personnel and supply chain partners on nonwoven technologies and end-use applications.

**The Nonwovens Basics Course** is a comprehensive one day training program covering nonwoven technologies and markets. It is aimed at personnel who have an interest in nonwovens; who purchase, use or specify nonwovens; or those who are considering nonwovens applications. Topics will include raw materials for nonwovens, web forming and bonding technologies, conversion and finishing technologies, test methods, applications and environmental issues.

**The Nonwoven Product Development Workshop** is a three-day intensive program with a combination of class work, lectures and "hands on" practice that covers the entire nonwoven product development process. In small teams, participants will develop a new product from design to product testing, including manufacturing and testing their prototypes in CSIRO's nonwovens laboratories. They will learn to select the correct fibre and process combination to achieve the desired results. Participants will learn about factors in fabric design for a wide range of products including market need, product design, material selection, finishing, cost and performance testing.

The workshop incorporates and expands upon the curriculum of the Nonwoven Basics course and is aimed at personnel who work directly with or intend to work directly with nonwovens manufacturing and product development.

Personnel from all sectors of the textile industry, including automotive, healthcare, medical, filtration and home furnishing, are urged to participate in this program to gain valuable insight into fibre and textile utilisation by nonwoven manufacturers.

Course instruction will be conducted by a field of CSIRO Textile and Fibre Technology experts, led by Dr Niall Finn, Account Manager Technical Textiles and Mr Ray Wood, senior nonwovens technician. Biographical details of course instructors are available on the TTNA website – [www.ttna.com.au](http://www.ttna.com.au)

A highly trained workforce is viewed by the industry as an indispensable ingredient to achieving world-class products and performance levels. These two workshops fill a significant gap in the needs of the sector and form part of a long term strategy being developed by the TTNA for appropriate education and training courses in technical and nonwoven textiles.

This project is proudly supported by the International Fibre Centre, a Victorian government company funded by the Victorian Learning and Employment Skills Commission.

What delegates liked most about these courses in 2006:

*"hands on approach with various fibres & machinery"*

*"clear, concise explanations & processes"*

*"interaction with CSIRO staff and other team members"*

*"broad content; easy to understand presenters /presentations"*

What delegates liked most about these courses in 2006:

*"Lab visit was fantastic"*

*"excellent intro lectures then great practical side"*

*"It was a fast-track type course from assuming no knowledge but fast in bringing attendants up to speed"*

In recognition of the long term strategic importance of the fibre and textile sector, the IFC and TTNA are working collaboratively to develop and deliver a suite of programs which will contribute to the sustainability of the technical and nonwoven textile sector and its extended supply chain. The International Fibre Centre is a Victorian government company funded by the Victorian Learning and Employment Skills Commission. For more information on this initiative and future programs, call the TTNA Management Office on (03) 9866 6643, or visit the websites: [www.ttna.com.au](http://www.ttna.com.au) [www.ifc.net.au](http://www.ifc.net.au)

## Two Courses in One Week:

# The Nonwovens Basics Course 2008

# Nonwovens Product Development Workshop 2008

Registration and Tax Invoice ABN 55 899 043 605

### The Nonwovens Basics Course Monday 12th May 2008

Please copy this form for each registration Price (inc GST):

**TTNA member organisations:**  \$210 for one trainee  \$199 each for two or more trainees

**Non-members:**  \$315 each  Students: \$110

Registration after 5th May: \$401 per person

### Nonwovens Product Development Workshop Tue. 13th - Thur. 15th May 2008

Please copy this form for each registration Price (inc GST):

**TTNA member organisations:**  \$790 for one trainee  \$750 each for two or more trainees

**Non-members:**  \$1,020 each  Students: \$340

Registration after 5th May: \$1,130 per person

Cheque for \$ \_\_\_\_\_ made payable to the TTNA, or

Please charge my credit card for a total: \$ \_\_\_\_\_

Bankcard  Visa  Mastercard Expiry date: / /
